Leveraging advanced SQL, Power BI, and Snowflake expertise, I have delivered scalable analytics solutions that uncovered over \$3.4M in financial discrepancies and optimized billing and shipping processes. By automating reporting workflows and integrating diverse data sources, I increased invoicing completion rates by 60%, enabling faster revenue recognition and improved operational decision-making. My collaborative approach with cross-functional teams drives durable, reusable dashboards tailored to complex data environments.

Work Experience

Data Analyst and BI Developer · Drummond Press · Jacksonville, FL (Remote) January 2025 - Present

- Performed financial, billing, and shipping audits and built persona-based analytics that enabled operations and finance to identify pricing discrepancies, preventing approximately \$1.8M in annual losses through improved billing accuracy and controls.
- Authored complex SQL and data-modeling solutions to replace inaccurate application reports, improving analysis reliability and enabling accurate downstream financial and operational reporting.
- Recovered \$250K+ in shipping overcharges by identifying carrier billing errors and implementing automated shipping-cost validation checks and alerts, reducing future discrepancies.
- Uncovered and corrected \$1.4M in duplicated job-cost data, refining financial reporting accuracy and strengthening data governance practices.
- Partnered with finance, operations, IT and executive leadership to define requirements and KPIs for on time delivery rates, invoicing timelines, equipment utilization, and to reduce overtime and temporary labor expenses.
- Increased invoicing completion rates from 49% to 78% by developing automated ETL pipelines and reusable Power BI reporting products, eliminating workflow bottlenecks and accelerating revenue recognition.
- Built end-to-end integrations (SQL, XML, QuickBooks) and data pipelines to support scalable, persona-based Power BI reporting products that improved decision-making for ops, finance, and executive management.
- Authored reporting standards and training materials to increase user adoption and standardize reporting processes across teams.
- Implemented Git-based version control for Power BI and SQL artifacts, enabling traceable deployments and supporting cross-functional collaboration.

Business Intelligence Analyst - GPO Support · McKesson · Jacksonville, FL (Remote) March 2024 - October 2024

- Designed and launched persona-based Power BI dashboards with optimized Snowflake data models to support GPO reporting and ad-hoc analysis for 7 VP-level stakeholders, improving decision cadence and report performance.
- Conducted Power BI data modeling to optimize data structures and improve report performance and refresh reliability.
- Executed ETL procedures using Snowflake, Toad Data Point, and SQL to centralize complex datasets and improve dashboard refresh reliability for operational decision-making.
- Automated dashboard refresh and republishing cadence to maintain up-to-date information for daily operational decisions.
- Conducted monthly admin-fee audits to ensure data accuracy and compliance prior to GPO submission.
- Developed SQL automations using Toad Data Point to streamline recurring tasks

- Participated in Agile ceremonies to prioritize backlog and resolve production issues.

Neurophysiologist · SpecialtyCare · Jacksonville, FL	June 2022 - February 2024
Neurophysiologist · The Phoenix IOM · St. Louis, MO	June 2017 - June 2022
Neurophysiologist · NuVasive Clinical Services / Biotronic · Jacksonville, FL	June 2015 - June 2017

Certifications

Microsoft Certified: Data Analyst Associate (PL-300) — Power BI ID: 9BEB8DD1BBFF1447	January 2025
Google Data Analytics Certificate ID: UBBBM38GAHP5	March 2024

Education

Flagler College | Bachelor of Arts
Psychology
St. Augustine, FL. Minor in Sociology.

Volunteer Work

Intraoperative Neuromonitoring Volunteer — Pediatric Orthopedic Project (Mission Trip) November 2021 - November 2021
· Pediatric Orthopedic Project · Santiago, Dominican Republic
Performed intraoperative neuromonitoring during pediatric scoliosis procedures. <https://www.pophopeteam.org/>

Skills

Tableau · Data Governance · Salesforce · SQL · Git · Eager to learn · data integration · code repository maintenance · Power Query — developed calculated measures for Power BI reports · Stakeholder communication and task prioritization — demonstrated through timely ad hoc reporting delivery · Power Query · Snowflake · Data Validation · Data Quality · QuickBooks · PivotTables · Dashboarding · Azure · Power BI Copilot · Data modeling · ETL · Power BI
